

# Environmental implications of global megatrends in Hungary

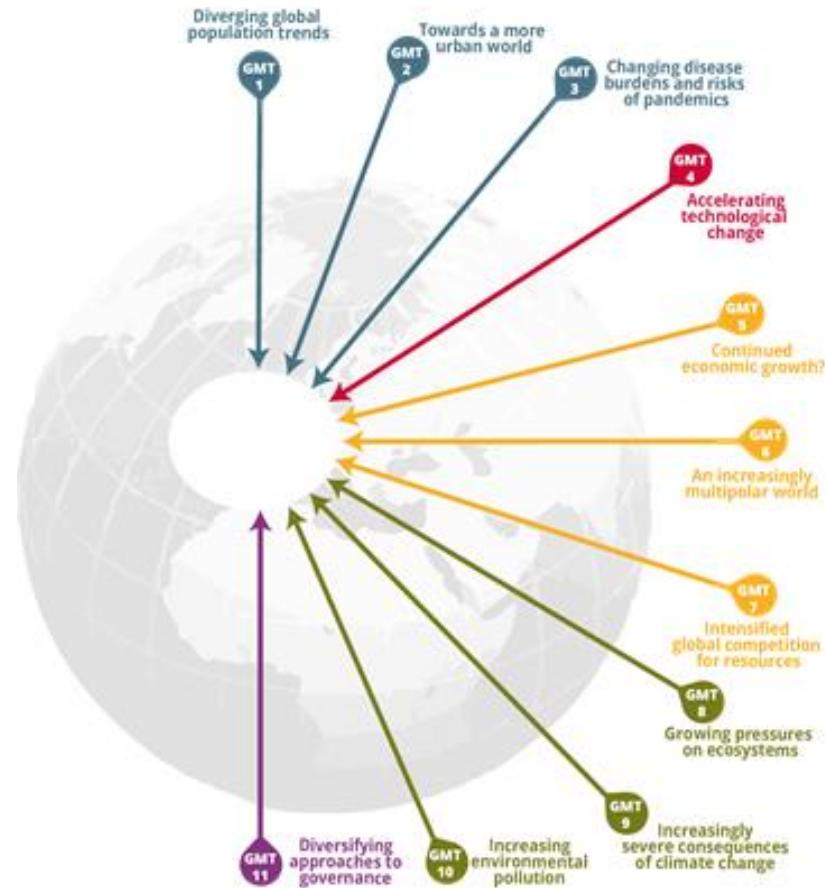

6th of March 2017

# MEGATREND

Megatrend indicates a widespread and long-term social, economic, environmental, political or technological change that is slow to form but has a major impact once in place.

Megatrends influence a wide range of activities, processes and perceptions in a system, such as an ecosystem, a sector or a region, possibly for decades.

Megatrend as a process of transformation is composed of sub-trends which in themselves are capable of major impacts.

# Globális megatrendek környezeti hatásai Magyarországon

0.5 munkaközi verzió

# Globális megatrendek környezeti hatásai Magyarországon

1. Lessening natural habitats (14 points)
2. Extreme weather patterns (floods, droughts) (12 points)
3. Health aspects of climate change (premature death, contagious diseases (9 points)
4. Growing emission of pollutants (9 points)
5. Growing water demands – decreasing potable water assets (9 points)
6. Adverse effects of free trade agreements to Hungary (7 points)
7. Transformation of natural ecosystems (less native species, more invasive species) (6 points)
8. Hungary becomes destination of migration (6 points)
9. Deterioration of ecosystem services (5 points)
10. Waste management (4 points)
11. + Alternative energy use gains attention (3 points)
12. Soil in quantitative and qualitative danger (3 points)
13. + Effective material use gains attention (3 points)
14. Lessening and ageing society (2 points)
15. Degradation of (surface and groundwater) water bases (2 points)
16. Longer allergic season (2 points)
17. Harmful effects of biologic renewable energy use (2 points)
18. Extreme hydrological events (droughts, floods) (2 points)
19. Growing differences between generations (1 points)
20. Going out of natural resource stocks (1 points)
21. + Research and innovation gains attention (1 points)
22. Hybrid wars (0 points)
23. Basic systems go beyond price (0 points)
24. Overloaded health and social system (ageing society) (0 points)
25. Collapse of pension system (0 points)
26. Extreme political powers gain attention (0 points)
27. Issues of housing estates (energy efficiency, mental hygiene) (0 points)
28. + disadvantages of little settlements drops (0 points)
29. Food supply endangered (e.g. „no maize yields in future”) (0 points)
30. + Longer growing season (0 points)
31. Less days with frost (0 points)
32. Pests do not freeze during winter (0 points)
33. Developing countries attract investors (0 points)
34. Degradation of soils (0 points)
35. Vulnerability and lessening of soils (due to urbanism) (0 points)
36. Further invasive species appear (0 points)
37. Weakening little settlements (0 points)
38. Deterioration of air quality (0 points)
39. Growing social and political tensions (0 points)
40. Forest fires become more frequent (0 points)
41. Forest stocks deterioration (0 points)
42. Resistivity of habitats declines (0 points)
43. + Migration of species may alter (e.g. birds), population may rise (0 points)

# Globális megatrendek környezeti hatásai Magyarországon

1. Lessening natural habitats, transformation of natural ecosystems (less native species, more invasive species), deterioration of ecosystem services
2. Extreme weather patterns (floods, droughts)
3. Health aspects of climate change (premature death, contagious diseases)
4. Growing air pollution
5. Growing water demands – decreasing potable water assets
6. Adverse effects of free trade agreements to Hungary
7. Hungary becomes destination of migration
8. Waste management
9. Soil in quantitative and qualitative danger
10. + Alternative energy use gains attention
11. + Effective material use gains attention

The project is progressing very well, and is likely to be published during summer in Hungarian language, and in September in English.

What we need is good practices, examples to follow. So...

## **Break-out groups**

11:00 – 11:45

### **Biodiversity, nature conservation**

(Moderator: Magdolna Sztarenszky Farkasné)

### **Soil use, soil quantity, soil quality**

(Moderator: Miklós Marton)

### **Air quality**

(Moderator: Krisztina Teréz Szabó)
